

# ENGLISH AND TECHNOLOGY.

**BY: WHENDY GALDONA.**

# English in the world.

English is a global language with more than 1.4 billion speakers worldwide, making it one of the most widely spoken languages. English is widely used as a second language and as a language of international communication in diverse fields, including business, science, technology, and culture.

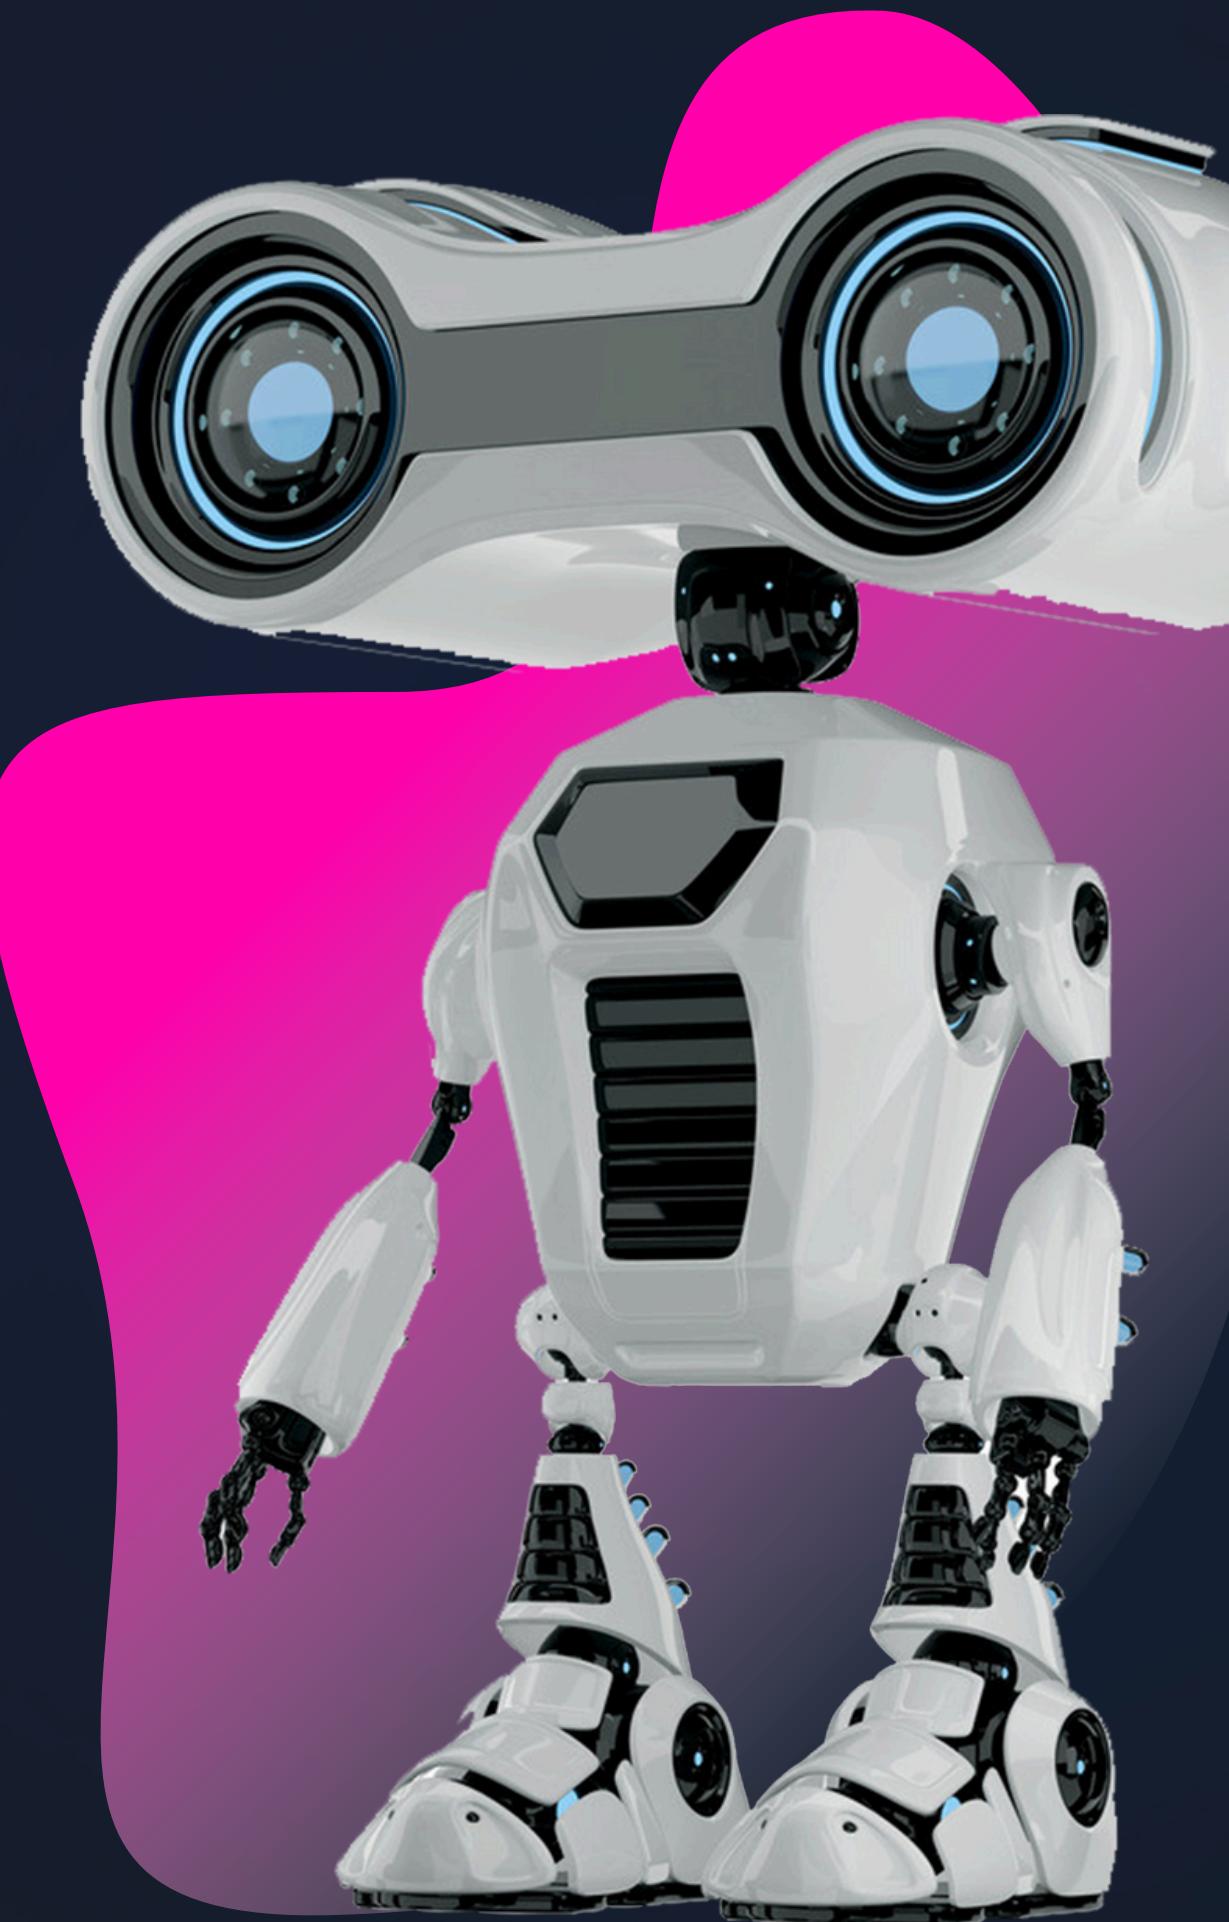

# English and technology.

English is fundamental in the technology field due to its predominance as a lingua franca in the industry. It is used in programming, artificial intelligence, technical documentation, discussion forums, and global collaboration. Technology, in turn, has revolutionized English language teaching, offering accessible tools and resources for students around the world.

We can use interactive applications, online learning platforms, multimedia resources such as videos and podcasts, and translation and proofreading tools to improve our language skills.

These are some of the apps, platforms, and online options for learning English:

1. Podcasts in English, Google, and YouTube.
2. Collaborative writing.
3. Online classes, through YouTube, Zoom, etc.
4. Watching series or movies online, Netflix, Prime Video, Disney, etc.
5. Digital games, Duolingo, Fubrain Words, games to learn English, etc.

# SHARED KNOWLEDGE.

English and technology are intrinsically linked, especially in the professional and academic fields. English is the predominant language used for technical communication and documentation, and mastering it facilitates access to resources, international collaborations, and job opportunities in the technology sector.

Most technical documentation, tutorials, courses, and online forums are in English, making proficiency in this language crucial to staying up-to-date in the field.

Most technical documentation, tutorials, courses, and online forums are in English, making proficiency in this language crucial to staying up-to-date in the field.

# TECHNOLOGY IN TRADE.

Technology has significantly transformed trade, from logistics and supply chain management to online sales and digital marketing. English is essential for international trade, as it is the common language for global communication and business.

Online platforms and websites allow businesses to reach a global market, offer products and services online, and manage sales and payments electronically.

Protecting data and online transactions is crucial for customer trust and business security, with solutions such as data encryption, two-factor authentication, and fraud prevention.

# LEARN ENGLISH ONLINE.

To learn English online, you can use a variety of free and paid resources, such as online courses, apps, interactive platforms, and educational videos. You can also take advantage of social media and websites to practice and improve your English skills.

## ONLINE COURSES:

Platforms such as edX, ABA English, and EF English Live offer structured courses for different levels, from beginner to advanced.

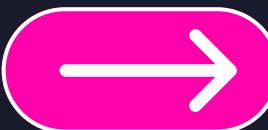

## APPS:

Duolingo, Babbel, and other mobile apps allow you to learn English through interactive lessons and games.

## SOCIAL MEDIA:

TikTok, YouTube, and other social media platforms offer educational and fun content for learning English.

## WEBSITES:

The BBC (British Broadcasting Corporation) offers free resources for learning English, including games and interactive activities.
